

Aquatx products are driven by our **passionate vision** that having a good time on the water means **hot design, fun, safety and stability**.

Aquatx brings together years of experience building sports water craft and a culture of innovation in both design and materials. This means that all Aquatx craft have outstanding performance and handling that can safely cope with the often changing and challenging conditions of New Zealand waters. This combines with tough build specifications that meet exacting **local and international standards** for uncompromising safety.

With a product range including kayaks, jet skis, sail boats, fishing boats and high end cabin boats, Aquatx means a great range of options for all your sports craft needs. Aquatx Inflatables offer **three groups of craft**. All share the benefits of high power to weight ratios - for **speed and fuel efficiency, stability, easy launching and low maintenance**. All Aquatx boats have a wide range of options to suit your needs.

FREESTYLE

Think of the Aquatx Freestyle as the Jetski for three or more. Freestyle offers the thrill of fast acceleration, tight turns and great towing - all with stability that only a rigid hull inflatable can provide. Launch it off the beach and teach the kids how to have fun on the water safely. The optional music system brings synchronised boating to new heights!

The Freestyle comes in 3.5m, 4.2m and 4.7m lengths. All have 3mm marine grade aluminium hulls and multi chamber 500mm tubes for a highly stable boat. The large tubes offer one of the widest, driest rides in the market with 1m of internal width (beam) giving plenty of room to move about when riding and towing. Built with a teenage family in mind, these boats are a great entry level, rugged boat. They are available in two different models with optional extras.

PRO SPORT

Rigid hull inflatables are the ‘boat of choice’ for many fishers and divers because of their speed, economy and unparalleled stability and ease of exit and re-entry on the water.

The Aquatx Pro Sport range has been designed to meet the needs of day trip fishing & diving. The Pro Sport range is available with standard outboard power or with Aquatx jet power options.

Available in 4.7m and 5.3m lengths, the 4mm marine grade aluminium, with a deep vee high performance hull, provides ruggedness and great handling in off-shore waters. The 500mm multi-compartment polyurethane tubes mean high levels of safety, stability and durability.

DELTA

The Delta range is designed to give you the benefits of a sports cruiser with all the extras that only rigid hull inflatables can provide.

Delta offers economical, comfortable, stylish, and fast cruising or full range off-shore fishing wrapped up in an unbeatable value for money package. These 6.0m and 7.0m boats feature fiberglass hulls, wide deck space (over 1.5m internal beam!) with seating for seven to ten adults!

PUMP SAILBOAT

The Pump is 2.7 metres in length, compact enough to be towed by the family car and easily lugged to the water, (see our 'Boat in a Box' boat-trailer combination below). The lightweight, almost unbreakable, polyethylene hull gives fast, quiet on-water performance with great stability and handling. The centerboard is rocker rigged to automatically fold into the hull recess when touching any obstruction.

Pump XL

The standard rigging on the Pump XL model means easy, no fuss handling with an unbeatable value for money deal.

Pump XS

The Pump XS, for the more experienced sailor, comes with racing sails, harness and extension tiller to allow you to experience the fantastic performance characteristics of this little hot rod.

The Boat in a Box

For the complete sailing package purchase the SailPod package. This comprises a stylish, aerodynamically efficient, purpose designed lockable trailer which secures the boat and your gear. A trailer cradle holds the mast and an extra kayak for added water fun.
